HEAD SECTION:

Meta tags for character set and viewport settings.

Title of the page: "Event Management."

Link to the Bootstrap CSS file for styling.

CSS STYLE:

Custom styling for the body, containers, cards, navigation bar, and other elements.

Styling for different sections like contact form, event images, and footer.

BODY SECTION:

Navigation bar using Bootstrap. An image with a responsive width. Three cards for different types of events (Corporate Event, About, Private Event). A call-to-action section with a heading and a phone call link. Another set of cards for different images related to events. A contact form section with fields for name, email, message, and a submit button. A Google Maps iframe for location display. A footer section with copyright information.

JAVA SCRIPT:

Links to the Popper.js and Bootstrap JavaScript files for functionality.

IMAGES:

The code references images for the cards and the background image. Make sure these images exist in the specified paths (`img/card2.jpg`, `img/c1.png`, etc.).

CONTACT FORM:

The contact form includes fields for name, email, and a message.

GOOGLE MAP:

An embedded Google Maps iframe showing a location.
